

Safe Disposal of Fluorescent Light Bulbs

4~2015

YOUR GUIDE TO SAFE DISPOSAL OF FLOURESCENT BULBS IN CALUMET COUNTY

Many fluorescent bulbs contain hazardous wastes such as mercury at toxic levels. While Wisconsin law does not regulate the disposal of fluorescent bulbs from households, these bulbs should be properly disposed to avoid contaminating the environment and harming human health.

Calumet County residents can dispose of fluorescent bulbs at the locations listed below. For more options go to www.focusonenergy.com/Residential/Lighting/cfl_recycling.aspx

Keep in Mind

If every home in America replaced just one incandescent light bulb with an ENERGY STAR qualified CFL, in one year it would save enough energy to light more than 3 million homes. That would prevent the release of greenhouse gas emissions equal to about 800,000 cars.

Broken fluorescent light bulb? Fluorescent light bulbs contain a small amount of mercury sealed within the glass tubing. When a fluorescent bulb breaks in your home, some of this mercury is released as mercury vapor. After cleaning up all visible pieces of glass and residue, seal in two plastic bags and put it into the outside trash, or other protected outside location, for the next scheduled trash collection. For detailed instructions, see: http://www.epa.gov/cfl/CFL_brochure.pdf
